### **SECTION 4: First aid measures**

#### 4.1. Description of first aid measures

**General advice:** Remove contaminated clothing immediately.

**Protection of first-aiders:** First Aid responders should pay attention to self-protection, and use the

recommended personal protective equipment when the potential for ex-

posure exists.

If inhaled: If inhaled, remove to fresh air. Get medical attention if symptoms occur.

On skin contact: Immediately wash thoroughly with soap and water. Get medical attent-

ion if symptoms occur.

On contact with eyes: Wash affected eyes for at least 15 minutes under running water with eye-

lids held open and consult an ophthalmologist.

On ingestion: Immediately rinse mouth thoroughly and then drink plenty of water. Do

NOT induce vomiting without medical advice. Get medical attention.

### 4.2. Most important symptoms and effects, both acute and delayed

The most important known symptoms and effects are described in sections 2 and/or 11. Further important symptoms and effects are so far not known.

### 4.3. Indication of any immediate medical attention and special treatment needed

**Treatment:** Symptomatic treatment (decontamination, vital functions).

### **SECTION 5: Firefighting measures**

#### 5.1. Extinguishing media

Suitable extinguishing media: The product is not combustible. Water spray. Alcohol-resistant foam.

Dry powder. Carbon dioxide (CO<sub>2</sub>).

Unsuitable extinguishing media: None known.

#### 5.2. Special hazards arising from the substance or mixture

**Specific hazards during** Exposure to combustion products may be a hazard to health.

firefighting:

**Hazardous combustion products:** Fire may cause evolution of carbon oxides.

5.3. Advice for fire-fighters

**Special protective** In the event of fire, wear self-contained breathing apparatus. Use per-

**equipment:** sonal protective equipment.

**Specific extinguishing**Use extinguishing measures that are appropriate to local circumstances

methods: and the surrounding environment. Use water spray to cool unopened containers. Remove undamaged containers from fire area if it is safe to do so.

### **SECTION 6: Accidental release measures**

#### 6.1. Personal precautions, protective equipment and emergency procedures

Personal precautions: Use personal protective equipment. Follow safe handling advice and

personal protective equipment recommendations.

#### 6.2. Environmental precautions

Discharge into the environment must be avoided. Prevent further leakage or spillage if safe to do so. Prevent spreading over a wide area (e.g. by containment or oil barriers). Retain and dispose of contaminated wash water. Local authorities should be advised if significant spillages cannot be contained.

### 6.3. Methods and material for containment and cleaning up

**Methods for cleaning up:**Soak up with inert absorbent material. For large spills, provide dyking or

other appropriate containment to keep material from spreading. If dyked material can be pumped, store recovered material in appropriate container. Clean up remaining materials from spill with suitable absorbent. Local or national regulations may apply to releases and disposal of this material, as well as those materials and items employed in the cleanup of releases. You will need to determine which regulations are applicable. Sections 13 and 15 provide information regarding certain local or natio-

nal requirements.

### **SECTION 7: Handling and storage**

### 7.1. Precautions for safe handling

**Technical measures:** See Engineering measures in section 8. **Local/total ventilation:** Use only with adequate ventilation.

Advice on safe Avoid inhalation of vapour or mist. Do not swallow. Avoid contact with

eyes. Avoid contact with skin. Handle in accordance with good industrial hygiene and safety practice. Take care to prevent spills, waste

and minimize release to the environment.

Advice on protection against

fire and explosion:

Observe the general rules of industrial fire protection.

Hygiene measures: When using do not eat, drink or smoke. Wash contaminated clothing be-

fore re-use.

#### 7.2. Conditions for safe storage, including any incompatibilities

**Requirements for storage** Store containers tightly sealed in a cool, dry and well ventilated place.

8.2. Exposure controls

**Engineering measures:** Ensure adequate ventilation, especially in confined areas. Minimize work-

place exposure concentrations.

Personal protective equipment

**Eye protection:** Safety glasses with side-shields (frame goggles, e.g. EN 166).

**Hand protection:** Chemical resistant protective gloves (EN 374). Material: butyl rubber.

Protective index 6. Break through time: >480 minutes. Glove thickness: 0.6-0.8 mm. Remarks: Choose gloves to protect hands against chemicals depending on the concentration and quantity of the hazardous substance and specific to place of work. For special applications, we recommend clarifying the resistance to chemicals of the aforementioned protective gloves with the manufacturer. Wash hands before breaks and

at the end of workday.

**Skin and body protection:** Wash skin thoroughly after contact.

**Respiratory protection:** Use respiratory protection unless adequate local exhaust ventilation is

provided or exposure assessment demonstrates that exposures are within recommended exposure guidelines. Filter type: Particulate type (P).
